FEDERAL COMMUNICATIONS COMMISSION

While we realize the need to maximize the efficient use of spectrum, and support the F.C.C. in its desires to provide for such for the future, we feel that the needs and limitations that exist for public safety have not adequately been considered in the drafting of this Docket.

As a result of the concerns expressed previously in this letter, we ask that the F.C.C. reconsider Docket 92-235, using such input as it has received and seeking additional input as needed, to derive a plan for spectrum use that will take into account these concerns, providing for cost-effective, phased implementation.

Thank you for your consideration.

Respectfully submitted,

Paul D. Fredrickson, Chairman
